

VEGAN PROTEIN

VEGAN PROTEIN BAR FOR HEALTHY LIVING

TEKMAR VEGAN PROTEIN bars consist exclusively of plant proteins. The mutual combination of soy, rice and pea protein will ensure a sufficient supply of pure proteins with a high digestibility of 78-95%.

Despite the fact that some consumers have prejudices against the consumption of plant proteins, the combination of three types of plant proteins is the way to provide the appropriate combination of essential amino acids that the body needs for its growth.

VEGAN PROTEIN BARS

not only provide essential nutrients and energy,
they also taste great.

VEGAN PROTEIN BAR

CAPPUCCINO/COCOA NIBS

BENEFITS:

100 % PLANT BASED PROTEINS,HIGHFIBRE,LOWGI,NOPALM FAT, L- CARNITINE, CALCIUM, VITAMINS AND MINERALS

FOR MORE INFORMATION

The bar based on vegetable proteins is a good alternative for those interested in protein nutrition.

MIXTURE OF PLANT PROTEINS The bar is exclusively made up of vegetable proteins. The cross combination of soya, rice or pea proteins with 17.5% provides 5 g of pure proteins, with 78-95% digestibility. The important benefit of the bar is the fact that plant proteins reduce calcium excretion from the body (hypocalciuric effect), compared to the animal proteins which result in increased calcium excretion from the body – the bone decalcification. This fact is important to people recovering from broken bones, people suffering from or susceptible to the osteoporosis.

DIETARY FIBER As the energy source it contains fiber – a polysaccharide - polydextrose. It is used as a substitute for sugar. The polydextrose has a low glycemic index characterized by the prebiotic effects, promoting the growth of probiotic “beneficial” bacteria in the gastrointestinal tract and includes inulin - plant polysaccharide, which is also the source of energy with low glycemic index and with prebiotic effects. Each 40 g bar contains 8 -8,4 g of fiber, which means it belongs to products with high content of fiber.

L-CARNITINE, VITAMINS, CALCIUM It contains L-Carnitine, which helps with production of energy from fats (it helps to burn fat in the body and accelerates the burning of fats ingested from food),

reduces fatigue and feeling of hunger. The bar contains 148 mg of calcium and the complex of E, C, B1, B2, B6, B12 vitamins, niacin, biotin, pantothenic and folic acids in an amount corresponding to 12-88% of the standard daily requirement.

SUMMARY The product is designed for people of age categories, for people with increased physical activity, who need to add proteins necessary for muscle regeneration, but it is also designed for the consumers who are interested in a balanced dose of proteins, fiber and minerals. Preferably, it will be used by people who prefer consumption of vegetable proteins instead of animal ones.
